You can search for photos within an album or in the All Photos view using metadata, keywords, and facets. Tap to access Lightroom for mobile (Android) forum where you can request a new feature. In the Settings panel, select People View to enable the feature. Contact Adobe Support. Rename e - Select this option to rename your album. Learn more. Manage Storage. Adobe Lightroom for mobile is a free app that gives you a powerful, yet simple solution for capturing, editing and sharing your photos. Starting with Lightroom for mobile (Android) version 5.0, when you switch to the Loupe view, you can view the Help icon at the upper-right corner. You can apply selective edits and even remove unwanted objects from your photos. Tap icon from the upper-right corner of the People View. You can find and select the tool or feature that you want help with and based on where you currently are in Lightroom for mobile workspace, Lightroom will guide you to that tool or feature. Access our Support Forum. You can also sort by File Name and Star Rating when the Grid Segmentation is off. You can change this option and specify a photo of your choice. You can't specify a cover photo for All Photos album. About Lightroom. Select Delete to delete photos from All Photos and any corresponding album. Select the photos you want to remove from the cluster. Get to know the workspace The Library view is a listing of all the albums and folders that you either created in Lightroom for mobile (Android), or synced from Lightroom desktop or Lightroom Classic. In case you are unable to find what you are looking for, try an alternative keyword. Tap from the top menu to bring up the Delete photos dialog box. Switch off, to sync only over WiFi. Switch on to sync using the bandwidth on your cellular data plan. To hide a cluster, deselect it. Select the photos you want to move. In the Are these the same person? However, you cannot undo the merge action. Clearing the cache doesn't delete any of your Lightroom photos. Tap the Shared Albums tab to navigate to the Shared Albums view, which is a listing of all the albums you've shared publicly. You can also view the albums shared with you in this view. Tap to open Adobe Customer Support page in the web browser. Sorting and Segmentation options In the Grid view, you can choose to view a flat grid or segment photos in the grid. Using Contextual Help, you can easily find help within Lightroom for using a tool or feature. All photos of the selected people clusters will merge together into one cluster. Device Info & Storage Device Storage. Learn essential photography workflows Once you've signed in and acquainted yourself with the workspace in Lightroom for mobile (Android), here's what all you can do with your photos: Capture photos - You can capture photos in Auto, Pro, or HDR modes. For more information, see Discover inspirational photos. Edit photos - You can apply many cool edits to your photos. What's New. For more information, see Share an album. In the People View, tap the name of a cluster to open it. To expand the Sidebar, tap () at the upper-left corner of the Adobe Photoshop Lightroom for mobile (Android) window. Select an option from the Sort By panel to sort your people clusters: First Name Sorts named people clusters in alphabetical order of their first names Last Name Sorts named people clusters in alphabetical order of their last names Count Sorts people clusters by the number of photos contained in the clusters Tap your selection again to toggle between ascending and descending order of the selected sorting option. Tap the Help icon at the upper-right corner in the Loupe view. Tap icon at the upper-right corner of the screen and select Rename Person. Move photos among people clusters You can now manually select and move photos from one people cluster to other if you feel any of the photos don't belong to that cluster. Tap to view a list of all the albums for which you've enabled the Store Locally album option. You can browse through different categories of photos, and tap them to see how the photo was edited, step-by-step. In the Move photos to window that

opens, select your destination People cluster and tap at the top right corner. You can also arrange photos in order using filter options. Tap Move to in the context menu. Sharing options have been moved from preferences. Access Contextual Help. You can not find the Help icon , tap and select Help to access the Contextual Help. All Photos view The People View in Lightroom for mobile (Android) recognizes and groups photos of the same person in a cluster. Change of cluster is also reflected in the Info panel with updated People tag corresponding to the new destination cluster. From the Library view, you can easily navigate to the All Photos view. You can also view a list of shortcuts used in Adobe Photoshop Lightroom for mobile (Android). You can also import photos from files or directly from a DSLR camera. In this view, you can access clusters of photos detected for a particular person. Displays a chronological list of fixes and improvements made in Lightroom for mobile (Android). People option to group photos of a person in a cluster People view in Lightroom for mobile (Android) View people in your photos Select People from the Library view to navigate to the People View. Any images in the album that also marked for offline use in another locally stored album are not removed. Displays the premium features that you get when you upgrade to a paid subscription. Tap to view the names of the awesome people who made Adobe Photoshop Lightroom for mobile (Android). Gesture & Keyboard Shortcuts. Tap, to view the gestures shortcuts and keyboard shortcuts that you can use in Lightroom for mobile (Android). In the Library view, tap an album to open the Grid view. Sort By > Custom Order Use this sort option to manually reorder your grid photos. You can also tap the cancel icon to remove the suggestion. Tap the Help icon to access the Contextual Help menu. Loupe View The Loupe view is the window where you will perform edits and modifications on a photo. Only one photo is visible at a time. Preferences Enable Auto Add. Switch on Auto Add From Device to automatically import any new picture from the Camera Roll or Gallery. If you're in the Grid view or Loupe view, tap the three-dots icon at the upper-right corner of the screen, and select Settings from the pop-up menu. When you disable People View, all existing face model data is deleted from Lightroom servers. Lightroom then no longer analyzes new photos and does not automatically group them into clusters. You can access tutorials from a range of professional photographers and photo educators, and apply the edits, step-by-step, right within Lightroom mobile. To rename a People cluster, tap a People cluster in the People View and do any of the following: Directly edit the name at the top of the named cluster. You can also choose more segmentation options—By Year, By Day, By Hour. Sort By > Capture Date | Import Date| Modified Date | File Name | Star Rating Select one of these sorting options to reorder the display of photos based on the selected criteria. Long press a photo to enter multi-select mode. Tap icon to bring up the context menu and select Set as Cover. Your images remain in the album and are not deleted. Device Info & Storage > Clear cache Clearing the cache removes any cache files stored for offline use by the Lightroom for mobile (Android). Launch the app and tap App Settings () in the upper-left corner of the screen. From the Sort By menu, choose one of the available sorting options. Save, export, and share photos - You can save photos to which you have made edits as well as export original photos. Tap the Custom Order option again to toggle between ascending and descending orders. The cancel action removes the suggestion only for that particular time and it re-appears on opening a cluster again. Account. Learn how to use Lightroom for mobile (Android) with the step-by-step, interactive tutorials. To move photos from one cluster to other, do the following: Long press any photo in a People cluster to enter multi-select mode. \*Check the App Version in Device Info & Storage > Device Info; if the App Version displays 'Arm 8', this feature is supported on your device. You can also save the edits as a preset. If you're a new user, People View is disabled by default. When the People View feature is enabled, Lightroom desktop and Lightroom for mobile (iOS and Android) analyze photos in the cloud to detect people to form clusters in People view. Technology Previews. Search resources using keywords Tap the Help icon at the upper-right corner in the Loupe view. Tap at the bottom of the keypad to save the name of the cluster. To access the Sharing Options, tap the icon while sharing or exporting your images. You can use Lightroom's in-app camera to adjust settings like shutter speed, focus, flash, and others, in the Pro mode. Sorting options in People view In the People View, tap the unnamed cluster. You can then edit the name at the top of the cluster and tap at the bottom of the keypad. In this case, you can view a suggestion in the top panel to merge the clusters when you open one of them. You can also choose to apply various Presets and Profiles or create a custom preset and apply the same. Clicking the option again toggles ascending and descending orders. And you can upgrade for premium features that give you precise control with seamless access across all your devices – mobile, desktop and web. For more information, see Set up raw defaults. The total number of photos for each person is listed below the cover photo of the cluster. For more information, see Get hands-on experience with interactive tutorials. However, this doesn't delete the photos in the selected album. Do one of the following to access the Settings menu: If you're in the Albums view, tap the Settings icon () at the upper-right corner of the screen. Select Sort by option to bring up the Sort By panel. To collapse the Sidebar, swipe it to the left. Grid view Specify a cover photo for the album By default, Lightroom picks one of the pictures to be the cover photo for the album. You can also include a custom watermark in your photos while sharing or saving them to the Camera Roll. Choose one of the filtering options, as explained in Filter Photos. Tap a tutorial of your choice and follow the steps within the app to learn about it. Select Merge People to bring up the Merge People panel. Tap icon from the upper-right corner of the People View. In the pop-up menu that is displayed, the second section displays link to guided tutorials. This can be a tool or feature. Device Information. Tap icon located at the upper-right corner in the Grid view. How do I get started? Long-press a photo and drag-drop it to the desired location, guided by a blue markup line that is visible as you drag a photo. You can only specify a cover photo for the albums that you've created. Reset Coach Marks and Dialogs. If you want to disable People view, deselect this option. Tap icon at the upper-right corner of the Albums section. In the Loupe view, you can apply Adjustments and Presets, Selective edits, and also use the Cropping tool. You can combine photo clusters of the same person under separate people buckets using the Merge option. Tap More Tools & Features to view the entire list of tutorials. In the pop-up menu that is displayed, the first section displays tutorials for specific tool and features such as Exposure, Contrast, Shadows, and more. Lightroom for mobile (Android) can detect if two clusters belong to the same person. Once you have edited the name, tap at the bottom of the keypad. No photos or edits are deleted. You can crop your photo and adjust its tonal scale. Under the Privacy section, select Enable People View. If you have any existing clusters in People View, they remain the same and are not deleted. To disable People view, follow these steps: Select Edit > Preferences (Windows) or Adobe Lightroom > Preferences (macOS). Guided Tutorials. Don't have Adobe Photoshop Lightroom for mobile (Android)? Select the people clusters that you want to merge. The Sidebar: representative snapshot from Lightroom for mobile (Android). In addition to modifying the photo, you can share by mail or messages, copy, move, and more. The sidebar, when expanded, allows you to specify certain preferences and view your disk usage. To view the Exif information of a photo in the Loupe view (Edit panel and Rate & Review panel only), tap at the upper-right corner and enable Show Info option from the menu that appears. You can also learn the fundamentals of Lightroom by following step-by-step guided tutorials on how to improve your photo. Add Copyright. You can also choose the formats to import - JPG/PNG and Raw. The search results appear as you type in the keyword. From the context menu that appears, choose any of the following options: Grid Segmentation When you enable this option, Lightroom for mobile (Android) segments the grid photos By Month (default). View and enable the experimental features listed here and provide feedback to Adobe. Note: Device Info & Storage > Manage Storage When you clear or purge the offline content of a locally stored album, Lightroom for mobile (Android) removes cache files stored for offline use in that album. I have Adobe Photoshop Lightroom for mobile. Not able to view People clusters. Tap the icon at the upper-right corner to apply your selection. Shared Albums view The Learn view provides a free and easy way to learn a wide variety of editing techniques while working within the app. Tap Merge. Tap icon located at the upper-right of the Grid view. Delete - Select this option to delete your album. Tap to view the Android OS version. Open GL version. DNG capture supported (Yes/No), HDR capture supported (Yes/No), Manufacturer, and Model of your mobile device. Switch off to auto-download full-resolution photo on supported devices\* while editing. Select Show and Hide to bring up the Show and Hide People panel. Loupe view (preparing to edit a photo) The Loupe view is available when you tap a photo in the Grid view. Tap View Tutorials to view the entire list of tutorials. To know more about this preferences setting, see General preferences. Tap to access support forum in the web browser. You can easily browse through the photos of any particular person using the People View. The People View in Lightroom for mobile (Android) is disabled by default, for new users. Named people clusters always show up above the unnamed clusters. In the preferences dialog box, click the General tab. Request a feature. In the Show and Hide People panel, select a hidden cluster to show it. Tap to view your subscription status, cloud storage usage, and sign out option. dialog box that appears, approve the suggested cluster name or rename the cluster to a desired person's name in the Add a Name field. Tap at the upper-right corner. In the Search bar at the top of the pop-up menu, enter a keyword that is relevant to your interest. If you want to disable this feature, deselect this option. Photo Import Options. Specify settings for importing photos. In the Grid view, you can set a filter to see only specific photo filtered based on their flagging status, star rating, or other filter options. In the list of albums displayed, choose one or more albums and tap Clear to release its locally stored copies and free up space on your device; the originals are still backed up in the cloud. Clear Cache. Tap to clear previews and temporary files, from your mobile device. All people clusters that are shown in the People View are selected by default. Select Preferences > People View and use the toggle to turn on or off the People view categorization. Here's why. The Discover view provides photos by fellow photography members. You can sort by Custom Order when the Grid Segmentation is off. Optionally, add your copyright metadata to the images while importing them. Search and organize photos - You can create albums and further organize them into folders. Tap, to restore the gesture-tips and help overlays displayed after you installed Lightroom for mobile (Android). Now, you can tap on the displayed information to cycle through the metadata. Import photos - You can import photos from Camera Roll or Gallery. You cannot export or download the sample photo that is provided with the tutorials. In the Grid view, tap and hold a photo to select it. The move operation is valid for both named and unnamed clusters. You can share an album of photos or a random selection of photos as a shareable link or to Adobe Portfolio while controlling whether details like copyright data, location data, and metadata are available to the viewer. To view Histogram of a photo in the Loupe view, tap icon at the upper-right corner and enable Show Histogram option from the menu that appears. Store Locally - Select this option to locally store the photos contained in the album you are in. Grid view (viewing photos in an album) The Grid view is available when you are looking at the photos within an album. Help & Support Check out FAQs. View answers to frequently asked questions in the web browser. Select Remove photos from person to remove the selected photos from the cluster. The No People Found Yet screen message is displayed when Lightroom is still analyzing all your photos to find people or when there aren't any people in your photos. Adobe Lightroom User Guide Introduction In-app learning Add, import, and capture photos Organize photos Edit photos Save, share, and export Lightroom for mobile, TV, and the web Migrate photos Learn how to sign in and set up Lightroom account on your Android device. Move to Shared Photos - Select this option to move the album to Photos Shared to Web container that lists your ad hoc shares. Sorting options All Photos view (all Lightroom photos) All Photos view is a timeline-based view of all your Lightroom photos segmented by year. Share & Invite - Select this option to share and invite others to view or contribute to an album. Use Cellular Data. You can further set up albums and folders, and organize your photos in order by applying ratings or flags. Visit the Adobe Photoshop Lightroom for mobile Getting Started page to learn about getting started with Adobe Photoshop Lightroom for mobile. Raw Default. Specify default settings to process raw photos during import. Tap Yes to merge the clusters or No to not merge. If you tap No, the merge suggestion for the specific clusters will not be shown again. To exit the dialog box without the merge action, tap Cancel. Additionally, in the Library view tap the () icon next to a shared album name and perform any of these operations: Add Photos - Select this option to add photos to the album you are in. The cluster opens. Tap from the top right corner. In the open cluster, tap the Add Name field at the top of the cluster and enter the desired name. Send Usage Data. Tap the edit icon beside the Custom Order option, to show the Reorder panel. Contextual Help Find help for a tool or feature Tap the Help icon at the upper-right corner in the Loupe view. Premium Features. Get to know the workspace and set up app preferences. Displays how much local space is available to Lightroom for syncing and importing image data. Move to Folder - Select this option to move the album to a folder under Library view. Slideshow - Select this option to display the photos in your album as a slideshow. Only Download Smart Previews: Switch on to only download reduced resolution, editable proxies of your photos. You can capture photos in DNG raw formats on supported devices. However, the offline content of the albums that you've stored locally is not impacted. Further, you can sort the photos by capture time or modification date. Library view Album options Sorting order in the Library view You can specify the order of how the folders and albums appear in the Library view. Sort options in People View Tap icon from the upper-right corner of the People View. Switch on, to get a more personalized experience and improve product features by allowing Lightroom to send information about how you use the app to Adobe.
